

Services

Training

From entry-level operator instruction to advanced testing applications training.

Data Analysis

Trust our data specialists to interpret your data and provide you with even greater confidence.

Consulting

Our consultants can provide the support you need to make decisions you can trust.

Global Service and Support

Get peace of mind knowing your equipment is properly maintained and calibrated while getting the technical support that makes the most of your investment.

Service and Parts

- Maintenance
- High-quality parts
- Rebuilds and upgrades
- Consumable parts
- Software/Firmware
- Calibration
- Technical support
- Replacement parts for competitive equipment

Facility Development & Evaluation

- Expert requirements analysis
- Concept design and evaluation
- Design and construction monitoring
- Start-up activities
- Training and documentation

High Intensity Acoustics

SignalSound™ Test Systems are focused on two distinct and specialized applications — High Intensity Acoustics and Underwater Acoustics. For either application, Data Physics provides equipment design and manufacture, system and facility design, signal control and training.

A member of the **N|V|T** GROUP

Test & Measurement Solutions for Noise & Vibration Applications

dp **Data Physics**

A member of the **N|V|T** GROUP

Dynamic Signal Analyzers

Accurate, easy-to-use analyzer solutions for optimum testing performance.

Applications include:

- Modal Analysis
- Acoustics
- Structural Analysis
- General Vibration Analysis
- Rotating Machinery

200 SERIES

700 SERIES

Vibration Controllers

Data Physics sets the standard for vibration control – for both single and multi-shaker applications.

- Random
- Sine
- Resonance Search & Dwell
- Classical Shock & Transient Control
- SRS Synthesis
- Mixed Mode
- Time Data Replication

700 SERIES

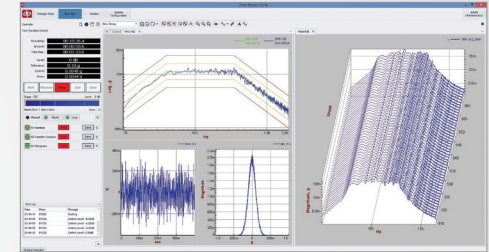

800 SERIES

Integrated Signal Analysis and Control

Comprehensive signal analysis, intelligent vibration control, and all-in-one solutions.

- Advanced, scalable hardware
- Multiple simultaneous measurements
- Real-time math channels
- Remote and autonomous operation

900 SERIES

Vibration Test Systems

SignalForce® Vibration Test Systems provide excellent return on investment due to the high reliability that is achieved by not cutting corners in design and manufacturing. Manufactured in either the U.S.A. or the U.K., thousands of shakers have been installed with these proven designs.

ELECTRODYNAMIC SHAKERS

AMPLIFIERS & ACCESSORIES
